- Matthew Zito – Chief Scientist

GridApp Clarity™

GridApp Clarity is the only out-of-the-box database administration solution to simplify and automate the management of complex, fragmented database environments. Clarity provides holistic insight into every aspect of the database infrastructure – across platforms, business units, and geographic locations – all through a centralized management console. Companies using GridApp Clarity on average reduce database deployment time by 90% and reduce database administrative costs by 75%. GridApp Clarity simplifies and standardizes deployments, patching, upgrades, migrations, configuration management and other repetitive database administration tasks. GridApp Clarity supports all major database platforms, operating systems and supporting architectures (e.g. clusters).

- Features – Centralized Management, Provisioning, Patch Management, Configuration Management, Upgrading, Migrating, Auditing, Compliance, Standards Enforcement, and Custom Pre-Built Actions
- Benefits – Optimized DBA Collaboration, Improved Efficiency, Reduced Costs, Accelerated Time to Market
- Customer Target – Enterprises with more than 50 database environments. Critical verticals include financial, pharmaceutical, telecommunications, managed services, insurance, e-commerce, manufacturing and the utility industry.
